**ECUK Engineers Registration - Preparatory workshop for
How to demonstrate the competences on the application &
Professional Review Interview
25 & 26 February 2019 (Monday & Tuesday)**

The Society of Operations Engineers has implemented The UK Spec Edition 3 since 1 January 2015, which is more simple and modern than SARTOR3 (1997) and with broader range of competences and requirements of professional responsibilities and obligations, and interpersonal skills.

Chartered Engineers and Incorporated Engineers (CEng/IEng) are characterized by their ability to develop appropriate solutions to engineering problems using new or existing technologies, through innovation, creativity and change. They might develop and apply new technologies promote advance designs and design methods, introduce new and more efficient production techniques, marketing and construction concepts, pioneer new engineering services and management methods. Formal education is the usual, but not the only, way of demonstrating the underpinning knowledge and understanding for professional competence and what is required for professional engineers for registration. SOE HK arranges the special workshop for the interested members to achieve the ECUK standard – To introduce the preparation of a professional review report and professional review interview / requirements and the route of becoming a professional engineer.

Speaker : Professor Edmund CHUK
PhD MSc(Eng) MBA CEng CEnv CBuildE HonFSOE HonFIPlantE HonFBES
HonFIRTE FCIBSE FEI FCABE FIEnv FHKITLM LifeSMCMES MAIB
